

For this project you will be developing a food truck of your choice. You will put all of your food truck's information, complete three recipe analysis/costing forms for three dishes on your menu, and an example menu onto a slides presentation/pitch that you will present to classmates. You will then design and build a model of your food truck.

- I. **Collecting information for your pitch project:** Use the graphic below to collect information on your food truck:

Type of Cuisine You'd Like to Feature: <i>Choose something besides American because we can all get that any time, bring in something that Kalispell needs.</i> Use this resource to determine the type of cuisine you want to use	
Main Dishes: <i>The resource above includes at least one main dish from your chosen cuisine: choose at least two other dishes you can use on your menu</i>	
Food Truck Rationale: <i>What is one reason why Kalispell needs this food truck? Write it here.</i>	
Inspiration Image # 1: Include an image of a logo or truck that inspires you.	
Inspiration Image # 2:	
Inspiration Image # 3:	
Food Truck Name: <i>Decide on a clever name to place here</i>	
Logo:	

<i>Every business (and outside of a truck) needs a good logo go here to create your own logo</i>

- II. **Costing Sheets:** You will complete 3 costing sheets for your truck's 3 main dishes (you can get these sheets from Brynn). Use the [Rosie app](#) (found in Classroom to price the items)
- III. **Menu:** Use the information from your costing sheets to create your menu. Use [Canva](#) to create a menu for your truck
- IV. **Food Truck Pitch:** use the slides template in classroom
- V. **Building a 3D model with Blueprints:** Brynn will guide you through these steps in class
